an electric height regulation desks which allows for customized standing and sitting positions and is a great ergonomically solution. The electrical height regulator, located underneath the work surface, simplifies changes in positions depending on one's office needs. Changing position during long working hours increases work effectiveness, productivity and health. To create an intimate climate, allows you to add acoustic panels. There are two types of acoustic panels which fit perfectly both horizontally and vertically to the worktop.

the ultimate solution for companies that have multiple project teams
who need more room to work and positively interact.
developed in such a way that essential ideas can be exchanged.
This is why you can use the panels interchangeably by dividing your workplace into
straight or intersecting sections. In our offer, you can find five different
types of panels which differentiate themselves by shape, finish and color.

One of the most important elements in planning your ergonomic office space, is the functionality of your office furniture. system offers a solution for creating workstations using Cargo containers. Cargo fulfills its role not only as a construction element but also as a place to rearrange all of your crucial documents. This type of arrangement is important in achieving optimal performance.
